Personal Experience

Web Developer

2009 – Present

Pica Design, LLC. Belfast, ME

Work with in-house graphic designers and project managers to create rich and robust websites to facilitate client businesses. Create html emails for clients, maintaining consistent branding and identity. Provide hands-on client web support, tutorials, and consultation. Develop new company ideas and practices. Proposed in-house Pica web hosting service, and affordable pre-packaged starter websites for small businesses. Seek out, recommend, and develop cutting-edge web applications and open-source code libraries. Collaborate with the whole Pica Design team to create a non-profit organization aimed at raising awareness surrounding the dangers of distracted driving.

Advanced Skills: Learned many new content management systems including Wordpress, Joomla, and Drupal. Learned project management practices and client communication skills. Learned open-source code libraries such as the YouTube Data API, YouTube Direct, Flickr API, and Google Gdata.

Programmer / Developer

2004 - 2009

Continuing Education and Distance Learning Orono, ME

Create and Develop multi-user, media rich web applications to facilitate online classes. Break down technology barrier for distance students with innovative and creatively designed systems.

Advanced Skills: Hand-coded front-end and back-end system design with a firm regard for deadlines and budgets. Dynamic content output with powerful and secure retrieval operations through AJAX. 100% Support for all current web browsers and versions. Responsible for handling odd requests from students and teachers with regards to new and cutting edge web development. Developed all content and classes to comply with Bobby Tests and screen readers.
